About BRIDGES

BRIDGES is an NSF TUES and NSF IUSE supported project which

1. provides **easy-to-use interfaces to exciting, engaging real-world data** (social networks, scientific data, etc), to make it possible for their use in freshmen/sophomore level CS courses,
2. makes it **easy to visualize course assignments** in a CS1, CS2, data structures, or algorithm courses
3. is carefully designed to **augment the student experience** in routine introductory courses in Computer Science

Here is a quick video introduction:

BRIDGES Examples

Example 1: A singly linked list using a reduced version of the IMDB actor/movie dataset.

Example 2: Bacon Number and Path Computation using the IMDB actor/movie dataset. Example illustrates the path between Kevin Bacon and Denzel Washington.

Example 3: A binary search tree built using
