BRIDGES Workshop
BRIDGES to Improve CS Education through Engagement

Motivation

Attrition rates in early foundational courses are high (40-60%), need to improve student engagement, and demonstrate the potential of Computer Science to incoming freshmen/sophomore students

BRIDGES’ approach

- Bring real-world datasets into the classroom.
- Visualizations of student generated data structures, interactions, algorithm performance/complexity.
- Student output shared (with friends, family) via web link
BRIDGES provides engaging Input and Output Available for students in Python, C++, and Java
BRIDGES in Data Structures Course

What is hard in a Data Structure course?

- Debugging is haaaard.
- I don’t understanding what the data structure looks like!?
- Does any of this matter in the real world?

Indexing USGS Earthquake

Bacon Number [IMDB Data]
BRIDGES Element Hierarchy (Lists, Trees, Graphs)
BRIDGES in Algorithms Course

What is difficult in an Algorithm class?

- Complexity is confusing!
- I am never going to use any of these crazy things.
- Why is he still talking about complexity?

Sorting Benchmark

Shortest Path (OSM)

Mountain Path (DP)
What is difficult in a CS1 course?

- Hello World is BOOOOOOOORING...
- We added two arrays of integers, I am soooo impressed...

Graphical Patterns and Analysis

Games
Students in BRIDGES sections gained more knowledge

Fall 2014

Spring 2015
Students in BRIDGES sections progressed faster in CS

Figure: Comparing long-term student achievement between students who used the BRIDGES toolkit in the Data Structures course vs. Control group. The evaluation was performed with 3 cohorts of students (Fall 14, Spring 15, Spring 16). Analysis performed Spring 2019.
Students using BRIDGES appreciate CS better

- Increased Interest in Computing
- Relevant to Career Goals
- Trivial and Not Essential to Computing

Graph showing the percentage agreement from F14 to S19.
Thank you!

Why adopt BRIDGES?
- Well tested: over 1000 students used BRIDGES
- Increased engagement
- A growing set of pre-designed assignment
- Support from the BRIDGES team
- Stipends available

How to adopt? Contact us!
