Select Open IDE

The screenshot shows the AWS Cloud9 console interface. At the top, the navigation bar includes the AWS logo, 'Services', 'Resource Groups', a star icon, a user profile 'bridges-user1 @ 8463-3440-4...', 'Oregon', and 'Support'. The main content area is titled 'AWS Cloud9 > Your environments'. Under the heading 'Your environments (1)', there are buttons for 'Open IDE', 'View details', 'Edit', and 'Delete', along with an orange 'Create environment' button. Below this is a list of environments, with one named 'bridges' highlighted in light blue. The 'bridges' environment details show 'Type: SSH', 'Permissions: Owner', and 'Description: No description available'. The 'Open IDE' button for the 'bridges' environment is circled in red. The left sidebar contains 'AWS Cloud9' with a close button, 'Your environments', 'Shared with you', 'Account environments', and 'How-to guide'. The footer contains 'Feedback', 'English (US)', '© 2008 - 2020, Amazon Web Services, Inc. or its affiliates. All rights reserved.', 'Privacy Policy', and 'Terms of Use'.

You Are Ready to JAM

The screenshot displays the AWS Cloud9 IDE interface. At the top, the menu bar includes 'AWS Cloud9', 'File', 'Edit', 'Find', 'View', 'Go', 'Run', 'Tools', 'Window', and 'Support'. On the right side of the menu bar, there are 'Preview' and 'Run' buttons, a user profile icon 'B', and a 'Share' button with a gear icon. Below the menu bar is a search bar with the text 'Go to Anything (Ctrl-P)'. The left sidebar shows the 'Environment' section with a file tree containing 'bridges - /home/brk', 'env', and 'tree'. The main workspace is titled 'Welcome' and contains a dark-themed welcome message: 'Developer Tools', 'AWS Cloud9', 'Welcome to your development environment', and a paragraph of introductory text. A 'Getting started' sidebar on the right lists 'Create File', 'Upload Files...', and 'Clone from GitHub'. Below the main workspace is a terminal window with the title 'bash - "ip-172-31-23-240" x Immediate x' and the prompt 'bridges-user1@ip-172-31-23-240:~\$'.

You should be able to compile and run codes in java and python by clicking on the interface.

To compile/run c++ codes, open up a terminal (Alt-T), navigate to that directory and compile with “make” .
